ABOUT ME

Final-year B.E. Computer Science and Engineering student focused on **AI/ML, backend development, and cloud technologies**, with hands-on experience building ML/AI systems, REST APIs, and data-driven applications through internships and projects. Interested in reliable and scalable software engineering.

EXPERIENCE

White And Box - Tech Products & Services Jun. 2026 – Jul. 2026
AI/ML Intern | [Certificate] Bengaluru, India

- Contributed to **Context Assembly Framework (CAF)**, a modular AI platform transforming structured business requirements into standardized, AI-ready instructions.
- Developed backend components supporting context processing, instruction assembly, versioning, and AI-driven application workflows.
- Worked with configuration-driven workflows, validation, structured **Pydantic** models, **NVIDIA NIM** connectivity, Streamlit, SQLite, testing, debugging, and documentation.

PROJECTS

The Shifting Threat: Assessing the Resilience of Algorithmic Trading Systems

- Research-oriented system for assessing the **resilience, reliability, security, and trustworthiness** of algorithmic systems under changing market conditions.
- Focuses on **distribution shift, concept drift, and market regime detection** for algorithmic Forex trading systems.

Cloud Cost Forecasting & Spend Anomaly Detection

- Built a **production-grade ML-driven FinOps platform** integrating AWS Cost & Usage Reports and GCP Billing Export into a unified schema for cloud cost analytics.
- Implemented **Prophet** forecasting for 7–30 day horizons and residual-based **Isolation Forest** anomaly detection, with MLflow experiment tracking and Streamlit analytics.

Enterprise LLM Trust Framework

- Built a multi-provider LLM evaluation and monitoring workflow covering factual correctness, hallucination, semantic similarity, response quality, and toxicity/safety.
- Implemented a generation → evaluation → critique → correction → re-evaluation pipeline with composite trust scoring, MLflow, and Streamlit.

EDUCATION

SRM Madurai College for Engineering and Technology 2023 – May 2027
Bachelor of Engineering in Computer Science and Engineering | CGPA: 7.81 Tamil Nadu, India

Minor in MBA Entrepreneurship

SKILLS

Languages : Python, Java, C, Rust, Solidity, JavaScript/TypeScript
AI/ML : PyTorch, TensorFlow/Keras, scikit-learn, Prophet, LLM Evaluation, MLflow, Prompt Engineering, RAG, AI Agents
Backend & Cloud : FastAPI, Spring Boot, Node/Express, REST APIs, Docker, AWS, GCP
Data & Tools : pandas, NumPy, MongoDB, SQLite, Streamlit, Hugging Face, Git/GitHub, SQL, Probability, Statistics

CERTIFICATIONS & ACHIEVEMENTS

NPTEL : Blockchain and its Applications (62/100), Apr. 2025 | **Google Cloud** : Gemini Enterprise Agent Ready, Mar. 2026
HackerRank : Orchestrate – Global Rank #1163 | **Code Resurrection 2026 – Port Mortem** : Finalist (natsort-rs)
